

Better Outcomes. Lower Costs. CMS Alignment.

**VANTAGE
HEMP**

A CBD Treatment Pathway Built for ACO REACH.

As an ACO REACH participant, you are accountable for total cost of care and quality outcomes. Chronic pain, anxiety, insomnia, and other conditions addressable by CBD contribute to high utilization of opioids, sedatives, and other costly medications.

Implementing a CBD treatment pathway aligned with the Substance Access Beneficiary Engagement Incentive (BEI) helps you improve patient outcomes, reduce costs, and meet CMS requirements.

Why Implement a CBD Treatment Pathway?

Improve Patient Outcomes

CBD may help manage pain, anxiety, sleep, and other conditions—reducing reliance on opioids and other high-risk medications when appropriate.

Reduce Total Cost of Care

Lower use of opioids, benzodiazepines, and other medications can reduce ER visits, hospital readmissions, and overall spend..

Support Safer Treatment Choices

CBD has a favorable safety profile and low abuse potential, aligning with the goals of the Substance Access BEI..

Meet CMS Requirements

A structured pathway with tracking and reporting helps you meet BEI expectations and maximize your incentive potential.

Differentiate Your ACO

Show leadership in whole-person, evidence-informed care that beneficiaries value and CMS rewards..

Vantage Hemp: Your Partner in Science

Pharmaceutical Grade CBD You Can Trust

Pharmaceutical Grade Quality

cGMP-certified manufacturing, third-party tested for purity, potency, and contaminants.

Consistent. Reliable. Scalable

Standardized formulations and rigorous quality controls ensure the same product every time.

Made for Healthcare

Formulated for clinical use with clear dosing, safety information, and minimal drug interaction potential.

U.S. Grown. U.S. Manufactured

Full transparency from seed to shelf—supporting your compliance and peace of mind.

Operational Support for ACO REACH Success
